Your Water UI Account

What is Water UI?

Water UI, or "Water User Interface," is the online customer portal through which North Unit patrons can log in and view their water usage. The customer portal is directly linked to the District's database, which as of the 2020 irrigation season is updated daily by the ditchriders, giving water users accurate water usage in real-time.

Through this customer portal, patrons can place water requests, track their water usage in real-time, view current land-usage records.

What's so great about it?

Though we enjoy your visits at the office and your daily calls for water requests, WaterUI gives you the tools to manage your water online and on your terms.

Order your water online

- Order your water on or off and change the flow **online**!

- Schedule your water orders in advance

- Keep track of which turnouts are on and what you have ordered
Track your water usage

- Know how much water you have, even for allotment years

- Track your water usage-to-date each season

- See your month to month totals and compare them to last year

- Track your water usage by turn out

Track your land usage

- View information on your owned or leased parcels such as taxlot, acreage, or recent crop grown

Make the most of your water with WaterUI!

What's Inside?

Special points of interest

- Schedule your water ON and OFF in advance online

- Know how much water you have left

- View water usage by turnout

- Know which turnouts are running and where they are on a map

- Compare your water usage to last year

Who can use Water UI?

Only those who have an account with NUID or are authorized by an NUID account holder can connect with NUID's database through WaterUI. To connect, a unique account number and an access code provided by the District are necessary to link the WaterUI account to the District database. There are two types of account holders that require different instructions to set up.

Primary Account Holders

The District will provide the unique access code and operators account number to the primary account holder of the NUID account. The account holder then inserts these numbers when making their Water UI Account.

Operators or "Authorized Users"

The primary account holder can authorize others, such as staff or partners, to access various levels of their information. Through their WaterUI account, under Settings, primary account holders insert the *authorized user's* email and create a unique 6-digit activation code. *Authorized users* then use that email, that 6-digit activation code, and the same operation account number to gain access to features such as (1) ordering water on specific headgates, (2) ordering water on all headgates, (3) complete access to all account information.

Set up and access your account at: nuid.waterui.com

How to Log–in

Go to nuid.waterui.com or follow the links from the main page of website **northunitid.com** (Click "Customer Login" in the top right corner of our homepage)

1. First time users will click the blue letters "**Don't have an account? Sign up here!**" to create your login and put in your unique account number and access code.

2. WaterUI will first ask to input an email and to set your password. The District does not have access to your password. If you forget it, you can always use the "**Forgot password?**" feature on the login page.

3. Next you will need to input your name and business name. These are viewable on our side and allows us to find your account and provide quality customer service to you .

4. Lastly, you will input your *operational* account number and its unique access code which will unlock access to your information. For these codes, contact the office either by phone or email.

Office : (541) 475-3625   Email: nuid@northunitid.com

Returning users only need to input their email and the password chosen when creating the initial account.

Who are authorized users?

It is not uncommon for an account owner to have support or a unique arrangements that include other trusted individuals to manage irrigation scheduling. Many farming and ranching operations require multiple managers to divide the work, others may only be subleasing for a period of the summer.

Whatever the arrangement, we give you full control over how much information you want to share with your team.

Under Settings, you have the ability to limit their access to your information, or you can share complete control. The levels of access can be changed, deleted or added to at anytime.

2017-2018 USAGE COMPARISON

We give the power to you to track your water usage from year to year.

Order Water Online

Order by headgate (yes, there is a reference map in case you forgot which headgate is located where)

Schedule and order your water up to **3 days in advance***

Track which turn outs are on and how much water you have ordered

Track when and at what flow rate (in cfs) was ran at each turn out

This is how it works (for more detailed instructions, view pg 4):

1. Log in through nuid.waterui.com

2. On the left hand sidebar, click the **Orders** tab

3. Under this tab you can request your turnouts to be turned **ON**, **OFF** or **CHANGE** the flow

* Regular "cut off" hours for orders still apply: Before 5:00 pm the night-prior for order below Haystack Reservoir, and before 7:30 am the day-of for orders above Haystack Reservoir

Tracking Water Usage

There are multiple totals provided through WaterUI that help you track your water usage.

Under WaterUI you will see your:

1. Total beginning balance by water right in acre feet (or by allotment if applicable)

2. Total water used to date in acre feet

3. Total water usage by headgate in acre feet

4. Track your water usage throughout the season

5. Compare your water usage to the previous year

6. Download your water usage data for your own records and data analysis

With this technology, the District will no longer require water transfers among rides for individual owner/operator. Each ditchrider can see your total remaining water balance. And all turnouts will be turned

Completing crop report surveys will now be a breeze as you use your interactive map, showing a map of your fields, labeled by parcel.

The parcels you own and operate are visible on an interactive map within *Land Records*. There a list by parcel number shows the owned leased properties that you operate.

After you complete our crop report survey, the records are entered and updated within the portal. You will always see what was grown the year prior.

Keep this in mind as you complete your crop reports, because someday this may be where you complete your survey. Online.

Schedule Water Requests

1. Log in through Nuid.WaterUI.com

2. On the left hand sidebar, click the Orders tab

Placing a Turn-On Order

3. Click "New Order Request"

4. Choose the Turnout through the drawdown tab

5. Set the start date (up to 3 days in advance)

6. Set the Flow Rate in Cfs (Same as always)

*7.a. If off-date is unknown, click *Save and Close*

*7.b. If off-date is known, click the drawn-down arrow on the "Shut Off" and click the date

Placing a Change Order

8. On the order you wish to change, click the pencil icon which indicates "edit"

9. Click "Change Flow"

10. Insert the desired NEW flow rate (NOT the difference)

11. Set the date the change should occur and click "Save and Close"

Placing an Off-Order

12. On the order you wish to turn-off, click the "Edit" button represented by the pencil icon

13. Set the Off-Date for the order, then click "Save and Close"

How to fix a mistake

If before the usual "cut off time," click on the "Edit" icon for the order you wish to fix. Click "Modify the request" to edit the flowrate, start or end time, or even the turnout. This only applies if the order has not been turned on.

Download Water Reports

Interested in tracking the success of new sprinklers, changes to irrigation scheduling, or a new irrigation systems? Or maybe check if your irrigation pond is leaking. Now you can download your water usage by turnout as an Excel file and do your own data analysis. See with your own eyes how much water could be saved, how much water usage has increased with different practices, or just for your own records.

Set up your account! NUID staff must provide this information to you:

Name of Owner/Operator_____

NUID Operator Account_____

NUID Access Code _____
